EXECUTIVE SUMMARY

- Accomplished Chief Technology Officer, Solution Architect and Software Developer with 10+ years of expertise leading digital transformation, agentic AI integration, and core cloud infrastructure modernization. Proven track record aligning C-suite strategy with enterprise system design and high-performance software engineering to drive scalable business growth.
- Expert in orchestrating end-to-end AI platform delivery, modernizing multi-tier cloud architectures across Microsoft Azure and GCP and managing technical risk. Uniquely bridges executive leadership, enterprise governance, and hands-on implementation literacy in AI, agentic workflows, LLM's and DevSecOps pipelines across international markets.

CAREER HIGHLIGHTS

- **AI Platform Architecture & CTO Leadership:** Architected and delivered an AI-driven digital wellbeing SaaS platform at ImBalance ApS, scaling agentic AI workflows, MCP, RAG architectures, and cloud infrastructure leading and working with a distributed 8-person multidisciplinary engineering team.
- **Enterprise Modernization ($300M Market):** Led enterprise digital portal application development for SEB's Swedish life and pension insurance division, modernizing Azure, RedHat OpenShift, pipelines, micro-frontends, and continuous delivery.
- **National Digital Infrastructure ($95M Total Programs):** Developed system integration diagrams, workflow automation, and cryptographic security for e-ticketing ($30M USD) and ISO/ICAO-compliant e-passport ($65M USD) platforms across Malaysia, the Bahamas, Maldives, Tanzania, and Turkey.
- **Open Source Security Contribution:** Identified and patched a critical zero-day phishing security vulnerability in Facebook's core ReactJS library, which was merged directly into the main operating branch.

CORE COMPETENCIES & TECHNICAL STACK

AI Stack	A2A, Agentic Systems, AI Governance, AI Solution Architecture, AI Transformation Strategy, Databricks AI, Gen AI, LLM Fine-Tuning, Model Context Protocol (MCP), Multi-Agent Systems, OpenAI Codex, Responsible AI, Retrieval-Augmented Generation (RAG)
Architecture	API-First Design, Cloud Architecture, Continuous Integration & Delivery, Enterprise Architecture, Event-Driven Architecture, Load Balancing, Micro Frontends, Microservices, Multi-tenancy, Serverless, Solution Architecture, Zero Trust Architecture
Cloud & Infra	Ansible, Apache Kafka, CI/CD, Cloudflare, Databricks, DevSecOps, Docker, GitHub Actions, Google Cloud Platform (GCP), Grafana, Helm, Kubernetes, Microsoft Azure, Prometheus, RedHat OpenShift, SonarQube, Splunk, SRE, Terraform (IaC)
Engineering	Angular, ASP.NET, C#, Cryptography, JavaScript, MongoDB, MySQL, .NET Core, Next.js, Node.js, Oracle, OWASP Security, PostgreSQL, ReactJS, Redis, SQL Server, TypeScript
Leadership	Agile / SAFe, Change Management, Cross-Functional Delivery, Engineering Leadership, Executive Stakeholder Alignment, Product Roadmaps, Project & Programme Delivery, Risk Management, Team Development, Technical Governance, Technology Strategy

PROFESSIONAL EXPERIENCE

Chief Technology Officer

Aug 2023 – Present

ImBalance ApS (Denmark) — AI Wellbeing Technology Platform | Remote

- Direct end-to-end solution architecture, platform vision, and technology direction for an AI-native digital wellbeing platform, orchestrating LLM integrations, agentic workflows, and secure microservices backend.
- Collaborate directly with C-suite and board members to align product strategy with enterprise technical capabilities, evaluating trade-offs, technical debt, governance, and business impact.
- Lead an 8-person cross-functional engineering team, establishing agile execution practices, automated testing, and CI/CD pipelines that accelerated feature delivery speed by 35%.

- Enforce Zero Trust Security, GDPR compliance, and cloud cost management, optimizing compute and LLM token usage while maintaining 99.9% platform reliability.

Senior Software Developer / Front-End & DevOps Technical Lead

May 2017 – Jun 2023

Skandinaviska Enskilda Banken (SEB) | Kuala Lumpur, Malaysia / Stockholm, Sweden

- Led design and front-end architecture for mobile-first enterprise banking portals supporting SEB's life and pension business in Sweden ($300M USD market domain).
- Architected build-and-release automation across Microsoft Azure and RedHat OpenShift, managing cluster provisioning, container scaling, data migration, and zero-downtime deployments.
- Pioneered canary deployment strategies, feature toggles, automated release notes, and structured changelog workflows to maximize production release stability.
- Engineered reusable micro-frontend design libraries and UI component frameworks adopted bank-wide, reducing frontend engineering overhead and accelerating time-to-market.
- Mentored engineering teams through code reviews, threat modeling walkthroughs, and architecture design-thinking sessions.

Senior Software Developer

Aug 2013 – Apr 2017

IRIS Corporation Berhad | Kuala Lumpur, Malaysia

- Contributed solution engineering for a $30M USD national e-ticketing smart-card program and led ISO/ICAO standards implementations for a $65M USD national e-passport initiative.
- Designed business process workflows, system integration diagrams, and architecture blueprints for national e-ID, e-passport, smart-card, and tax-refund platforms across the Bahamas, Maldives, Malaysia, Tanzania, and Turkey.
- Architected migration of legacy Classic ASP systems to modern .NET/C# architectures, authoring system design specs and technical risk estimates.
- Implemented robust cryptographic controls, salted password hashing, stored procedures, and security mechanisms mitigating SQL-injection risks; delivered workflow automation that reduced turnaround time by 40%.

EDUCATION & CERTIFICATIONS

Master of Business Administration (MBA)

2015 – 2017

Staffordshire University | Distinction

BSc Computer Science, Software Engineering - First Class Honours

2010 – 2013

Staffordshire University | CGPA: 3.70

Certifications:
Certified SAFe 4 Scrum Master, Databricks AI Agents Fundamentals.
Google Cloud Platform (GCP) Certified, Microsoft Azure Solutions Architect Expert.

SELECTED LEADERSHIP, CONTRIBUTIONS & PUBLICATIONS

- **MBA Dissertation:** The Impact of Mobile Banking on Financial Inclusion, Staffordshire University UK.
- **Facebook**: Discovered and submitted a zero-day security-vulnerability fix merged into the main ReactJS operating branch.
- **Open Source**: Contributed reusable UI components to SEB's open-source component library accelerating software delivery.
- **Community:** SEB Culture Ambassador, Strategic Planning Committee-Kenya High Commission, TEDxKL Planning Committee.
- **Thought Leadership:** Author of 'The New Architecture of Financial Trust in the Age of AI' (Portals of Possibility Series) Business News Malaysia & Op-Ed on Civic Technology in Daily Express.
