EXECUTIVE SUMMARY

- A diligent solution delivery leader with **10+ years of experience.** I work closely with C-suite leaders and senior stakeholders to turn business goals into clear technical choices, delivery plans, and measurable outcomes.
- Current Chief Technology Officer remotely leading an 8-person multidisciplinary team at **ImBalance (Denmark & Macedonia)**, with earlier enterprise experience at **SEB ADC (Malaysia)** and solution architecture across national digital platforms.
- Increasingly focused on opportunities at the intersection of **AI Transformation, Solution Architecture and Technology Leadership** combining executive advisory, consulting, leadership and strong implementation literacy.

CAREER HIGHLIGHTS

- Leading product and technology delivery for a digital wellbeing platform as CTO, managing an **8-person multidisciplinary team** and owning architecture, infrastructure, engineering standards, security and delivery.
- Delivered enterprise digital platforms within **SEB's Swedish life and pension insurance business**, combining application architecture, cloud infrastructure, DevOps and release leadership.
- Designed workflows, integrations and solution architectures for **National** e-ticketing, smart-card, e-ID, e-passport and tax-refund **platforms** across Malaysia, the Bahamas, the Maldives and Turkey.
- Contributed to **Build Operate Transfer (BOT) technology platforms** including e-ticketing, smart-cards and e-passport implementations in multiple international markets.
- Contributed to Facebook's Open Source ReactJS project patching a **security-vulnerability** that addressed a zero-day phishing attack via the browser which was subsequently merged into their main operating branch.

CORE COMPETENCIES

AI Stack	Agentic AI, AI Governance, AI Solution Architecture, AI Transformation Strategy, Responsible AI
Architecture	Cloud Architecture, Enterprise & Solution Architecture, Serverless Architecture, Zero Trust Architecture
Cloud & Infra	Continuous Integration & Delivery, DevSecOps, IaC, Migration, Platform & Site Reliability Engineering
Leadership	Engineering Leadership, Executive Stakeholder Alignment, Team Development & Mentorship
Project Management	Change Management, Cross-Functional Delivery, Project & Programme Delivery, Product Roadmaps

PROFESSIONAL EXPERIENCE

Chief Technology Officer
Aug 2023 - Present

ImBalance (Denmark)

Product and technology leadership for an AI-Driven Digital wellbeing technology platform

- Aligning business, product and technology stakeholders on scope, architecture decisions, delivery trade-offs and customer outcomes.
- Leading an **8-person multidisciplinary team**, establishing delivery priorities and operating rhythms across product and engineering.
- Directing end-to-end solution delivery from discovery through architecture, implementation, release and continuous improvement.
- Owning solution architecture, platform direction, infrastructure, engineering standards, security and the management of technical risk.
- Translating business priorities and user requirements into product strategy, technology direction and an executable delivery roadmap.
- Coaching team members and reinforcing a culture of ownership, technical depth, collaboration and measurable customer value while strengthening engineering execution through pragmatic delivery practices.

Senior Software Developer
May 2017 - Jun 2023

Front-End & DevOps Technical Lead

Skandinaviska Enskilda Banken (SEB)

Enterprise digital platforms supporting the Swedish life and pension insurance market

- Led the design, development and change management of mobile-first digital portals supporting SEB's life and pension insurance business in Sweden, operating within an approximately **USD 300 million market**.
- Owned front-end architecture direction and the reusable component ecosystem supporting current and future digital applications across the domain.
- Integrated application infrastructure and developed build-and-release pipelines across **Microsoft Azure and OpenShift**, including cluster maintenance, data migration, scaling and deployment coordination.
- Modernised continuous delivery through structured change logs, canary releases, feature toggles and automated release-note processes.
- Evaluated technologies and engineering approaches to improve application **scalability, performance, availability and maintainability**.
- Mentored developers through code reviews, technical workshops, architecture walkthroughs and design-thinking sessions while coordinating releases across multidisciplinary stakeholders.

PROFESSIONAL EXPERIENCE

Progressive Engineering & Solution Architecture Roles Aug 2013 - Apr 2017
IRIS Corporation Berhad
Senior Software Developer

- Contributed to a **USD 30 million e-ticketing and smart-card programme** and implemented ICAO and ISO standards enhancements for a **USD 65 million e-passport programme**.
- Designed business workflows, system-integration diagrams and solution architecture diagrams for **national e-ticketing, smart-card, e-ID, e-passport and tax-refund platforms** across the Bahamas, the Maldives, Malaysia, Tanzania and Turkey.
- Led architecture and migration activities for legacy Classic ASP applications transitioning to .NET and C#, producing system-design documentation, implementation guidance and technical risk estimates.
- Led a **3-person development team** delivering a multi-tier budgeting and forecasting platform integrated with third-party enterprise applications through web services.
- Delivered a content-management solution that increased **user engagement by 25%** and improved **business-process turnaround time by 40%**, alongside workflow automation and enterprise application enhancements.
- Improved application security through cryptography, salted password hashing, stored procedures and controls designed to mitigate SQL-injection risks.

AI, DATA & TRANSFORMATION DEVELOPMENT

AI Ecosystem
- Agent Bricks, Cursor AI
- Databricks Stack, Jev, Open AI Dots

Solution Delivery Focus
- Agentic AI systems and workflow orchestration,
- AI Transformation journey through designing, implementing and scaling AI responsibly and with trust

EDUCATION

Master of Business Administration (MBA) 2015 - 2017
Staffordshire University I Distinction

BSc Computer Science, Software Engineering - First Class Honours 2010 - 2013
Staffordshire University I CGPA: 3.70

SELECTED PROFESSIONAL CREDENTIALS

- Certified SAFe ® 4 Scrum Master
- Google Cloud Platform (GCP)
- Microsoft Azure Solutions Architect
- Databricks AI Agents Fundamentals

TECHNOLOGY & PLATFORMS

AI Stack	A2A, Agentic Systems, Gen AI, Large Language Models, MCP, OpenAI Codex, RAG
Architecture	API First Design, Load Balancing, Microservices, Micro Frontends, Modular Architecture, Multi-tenancy
Cloud & Platforms	Apache Kafka, Databricks, Docker, Microsoft Azure, GCP, RedHat OpenShift
Databases	MongoDB, MySQL, Oracle, PostgreSQL, Redis, SQL Server
Programming	Angular, ASP.NET, C#, JavaScript, .NET Core, ReactJS, TypeScript
DevOps & SRE	Ansible, GitHub Actions, Grafana, Helm, Kubernetes, Prometheus, SonarQube, Splunk, Terraform

SELECTED TECHNICAL CONTRIBUTIONS

- **Facebook:** Submitted a security-vulnerability fix that was subsequently merged into the ReactJS main branch.
- **SEB Library:** Contributed to SEB's open-source component library that accelerated application development throughout the Bank.

SELECTED PUBLICATIONS & LEADERSHIP

Publications and Thought Leadership
- MBA Dissertation - The Impact of Mobile Banking on Financial Inclusion, **Staffordshire University UK.**
- Publication - An op-ed on how Governments could use technology to address Covid-19, **Daily Express Malaysia**.
- Technology Op-ed - Awareness, as a preventive measure against financial fraud in the age of AI, **Portals of Possibility Series**.

Leadership & Service
- SEB Culture Ambassador • TEDxKL Planning Committee • Strategic Planning Committee - Kenya High Commission in Malaysia.
